## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 22 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Election/Restrictions*

Claims 19-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/22/05.

### *Claim Objections*

Claim 3 is objected to because of the following informalities: the word "direct" is misspelled and should be changed to "direction" (p. 3). Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Publication Number 05-319199 in view of European Patent Application 0783997.

Japanese Publication Number 05-319199 disclose the claimed elements as shown in Figure 1 comprising two concentric combustion chambers 20, 26 with a

communication hole 34 between them closed by a thin plate 36. Japanese Publication Number 05-319199 does not specifically disclose that the plate is metal having a tensile strength of 15 kg/mm<sup>2</sup> or more and a thickness of 10-200  $\mu$ m. European Patent Application 0783997 disclose that it is well known for a plate between chambers to be stainless steel with a thickness of 46  $\mu$ m and a tensile strength of 55 kg/mm<sup>2</sup> (page 10) in order to provide a lower thickness rupture plate with a high degree of stability as to tensile strength (page 4). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide that the plate of Japanese Publication Number 05-319199 is metal having a tensile strength of 15 kg/mm<sup>2</sup> or more and a thickness of 10-200  $\mu$ m, as taught by European Patent Application 0783997, in order to provide a lower thickness rupture plate with a high degree of stability as to tensile strength.

### ***Conclusion***

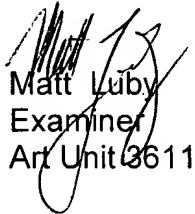

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it is a dual stage/dual combustion chamber gas-generating device for an airbag assembly.
